

A voluntary, cost-efficient and flexible labelling scheme for the reduction of water consumption in sanitary tapware

# The European Water Label

One Europe – One Label  
water consumption at a glance

## WHAT THE LABEL SAYS

- ☑ **A simple tool** to inform consumers on water consumption of taps, valves and showerheads
- ☑ **A single label** used throughout Europe
- ☑ **A complete database** of labelled water saving products

## WHAT THE LABEL SHOWS

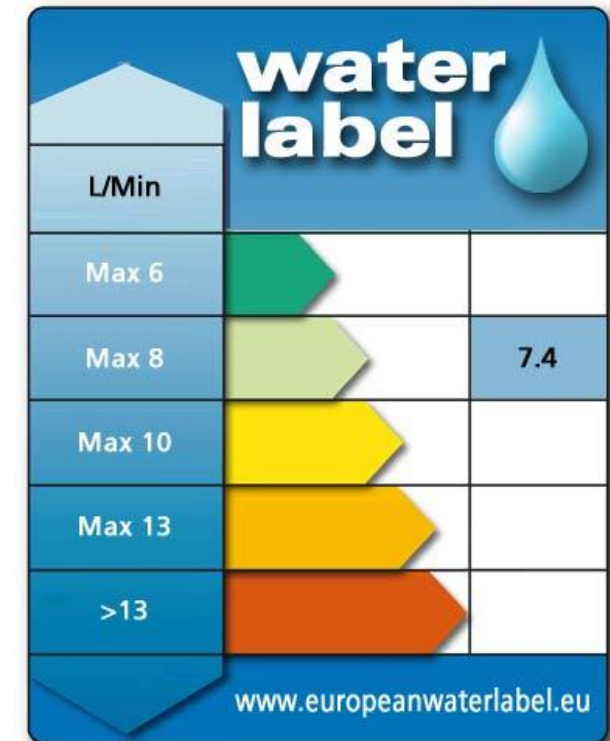

- ☑ It clearly shows the volume of water that the product will consume if installed correctly and according to the manufacturer's instructions
- Litres per minute
- Coloured performance bands
- Actual capacity/performance

## The European Water Label

The European labelling voluntary scheme to improve the water consumption and performance of taps, valves & shower heads

“Helping the consumer to make an informed choice”

## The simple classification scheme applicable throughout Europe

- ✓ Sets harmonised water flow requirements conforming to any legal national requirements
- ✓ Promotes the use of water saving taps, valves and shower heads in private and public buildings
- ✓ Self-declared and monitored by independent audits to keep the scheme cost-efficient
- ✓ Informs European consumers on water consumption of taps (basin and kitchen) and shower heads
- ✓ Invites consumers to check the products database to find water saving taps, valves and shower heads in their country
- ✓ Maximises the effectiveness of the labelling scheme and monitors its implementation
- ✓ Contributes to the various efforts to save water and energy
