

Training on CBAM Regulation Reporting Requirements:

Essential Insights for Sanitary Taps, Building, and Industrial Valves Industry

Date and Time: Wednesday 24 January 2024 | 09.00 – 11.00 CET

Delivery Mode: Online via Zoom

Trainer: [Benjamin Frugier](#)

Webinar Overview:

Join us for an exclusive webinar on EU's Carbon Border Adjustment Mechanism (CBAM) regulation reporting, tailored specifically for our industry. If you import material or castings from outside EU, you are now subject to the CBAM regulation and you must first declare carbon emissions to customs and support a new carbon tax in a second step. Don't worry we have put together an education to help you.

As the deadline for the first CBAM report submission approaches (31 January 2024), our expert will guide you through the critical aspects of compliance and reporting requirements.

What You Will Learn:

- **Understanding CBAM Regulation:** Grasp the core principles and objectives of the EU's CBAM regulation.
- **Reporting Requirements:** Detailed walkthrough of the reporting obligations for the first CBAM report due by 31st January 2024. Including:
 - Customs-related issues (registration / calendar)
 - Overview of the declaration
 - Identification of the processes
 - Surveillance of the processes
 - Calculation methodology
 - o Direct emissions / indirect emissions
 - o Simple goods / complex goods
- **CBAM Transitional Registry:** Insights into registering and managing submissions in the CBAM Transitional Registry.
- **Practical Compliance Strategies:** Tips and strategies for efficient compliance with CBAM requirements.
- **Industry-Specific Impact Analysis:** Analysis of how CBAM regulation impacts the Sanitary Taps, Building, and Industrial Valves industry.
- **Q&A Session:** An interactive session to address your specific questions and concerns.

Who Should Attend:

- Executives and Compliance Officers
- Environmental and Sustainability Professionals
- Policy Makers and Regulatory Affairs Specialists
- Business Strategists and Consultants in the Environmental Compliance field

About the Instructor Benjamin Frugier:

Benjamin Frugier is currently Director within the French Federation of Mechanical Engineering Industries (FIM), in charge of regulatory policy (environment, internal market and trade) and economic issues. He spent 6 years in the industry (automotive & energy) as engineer and project manager, 6 years in a standardization body in the mechanical engineering industry as manager and 3 years in a consulting company (R&D programs) as senior manager.

With regards to CBAM, he conducted several studies regarding the carbon content of steel, to provide companies with insight on that matter, both technical and economic. These studies cover existing processes (BOF-BF and EAF) and their related emissions, the future technologies (Hydrogen / CCUS) and their associated costs. In addition, he conducted a study to assess the economic impact of CBAM on the metal and mechanical engineering industries, based on ETS 3 and ETS 4 criteria. He has lately organized webinars on the implementation of Commission implementing Regulation 2023/1773 regarding CBMA reporting obligations.
